THEIA - HELP

Please note the following before using the application:

   1. THEIA is a search technique that uses the text contained
      in the images as a search handle .
   2. You can enter the required word in the "Enter the search
      word here" dialog box and click on "Search" to get the
      search results, i.e, the images that contain the searched
      word.
   3. If no image contains the searched word, no results will
      be displayed. Please check the word that you have typed
      in the dialog box for any typos or spelling mistakes.
   4. For any further assistance please mail us at
      theiasearch@gmail.com
